Computer Science Engineering B.Tech  
8.7 GPA

## Projects

**Blog Website** **2023**  
 <https://github.com/nitindhiman01/CODSOFT.git>

- A web application that lets the user create their own blog posts and post them.
- It covers all the basic functionalities like user authentication, user profile, database, comments etc.
- The Frontend is developed using technologies like HTML, CSS and JS.
- The Backend is developed using Node.js. Page for every post is generated dynamically using EJS.
- MongoDB is used as database to store user information and the blogs.

HTML, CSS, JavaScript, MongoDB, Node.Js, Express.Js, EJS, Passport.Js

**Personal Portfolio** **2023**  
Desktop Version  
 <https://nitin-develops.netlify.app/>

- A website to showcase my skills and my work.
- Developed using React.Js

React.Js

**Shree Durga Mineral Solution** **November 2023 - Present**  
 <https://github.com/nitindhiman01/ShreeDurgaMineralSolution.git>

- A mineral water delivery full stack website.
- A team project for local area mineral water delivery. This website provides tracking of subscription for daily mineral water facility and users can place orders.

HTML, CSS, JavaScript, Node.Js, Express.Js, MongoDB, EJS
